

COSC 1010 – Introduction to Computer Science I, spring semester 2016

Performance Indicator (i.2): Program in Java, including use of the Java collections and other useful Java frameworks

Homework 8: The salesReport project allows an employee to enter a simple daily sales report and prints out the results. The employee must enter his username and password. After verifying the username and password, the program allows the employee to enter his sales details for the day. Sales details include the product name, product ID#, price, and quantity sold. An object should be created for each product and then added to the daily collection of product objects. When the salesperson is finished entering data, the program calculates the total cash value of the salesperson's sales for the day and prints out the report.

There were 12 Computer Science majors in the course, 6 of them did not turn in the assignment.

6 students were assessed.

6 students excelled.
