COSC 3050
Codes of Ethics
Bring to Class, February 10, 2016

You have read documents that talk about creating Codes of Ethics and you have read the ACM, IEEE, and Software Engineering codes.

I now require you to bring to class a set of four (4) elements that you believe should be included in a Code of Ethics for an organization. This assumes that **you** would be willing to work for an organization that had such elements in its code.

You do not have to write a complete Code of Ethics. DO NOT include any kind of preamble or discussion. Just the four statements (elements) that you would like to see in such a code.

Bring to class two (2) copies of this. Other than the statements, the document need only have your name on it.

We will discuss these in class. There <u>will</u> be a grade on your submission.
